

# 3D printing in construction

## Join the VDMA Baustoffanlagentag!

March 19/20, 2020 in Eindhoven

3D printing has become a disruptive technology in different industries. In the construction sector it is shifting right now from research and development to commercial application.

One of the main driving forces on the academic side is the Eindhoven University of Technology in the Netherlands. The VDMA conference Baustoffanlagentag 2020 takes you to Eindhoven. Leading stakeholders from academia and industry will be present as speakers and B2B contacts. Be part of the network of this fascinating and pioneering technology.

On March 19 we will hold a conference at the Eindhoven University of Technology. On March 20 you are invited to visit with us the **Bruil Prefab workshop** near Eindhoven where a 3D construction printer is already producing on a commercial level. Your participation is free of charge.

### Venue

Eindhoven University of Technology  
Senaatszaal  
De Zaale  
Eindhoven

A free bus transfer for all conference attendees will be offered on March 19 between the Inntel Hotel and the conference venue and on March 20 between the Inntel Hotel and the Bruil prefab workshop.
